Truly interactive Live Sessions

At e-GMAT we strive to make learning as effective as possible

-Rajat Sadana, founder e-GMAT

- "This is my first session .The content and the session was good .Though it was new and took time to settle down , what actually impressed me is the culture in the group ... to be as interactive as possible and to pose a question even though the question is real basic. I guess the credit goes to Payal .. because .. you only get interactive when you know someone will answer the question without judging the question"

"e-GMAT SC course is BRILLIANT. I think this is priceless because I was struggling with how to approach long SC qs (those with like 3-4 clauses in-built). This is something you cannot get from Ron Purewal's posts or videos yet (in those Thu sessions, you can only see him focusing on the incorrect part of sentence but not on how he will do that question if he was taking the GMAT and that question popped up. Payal does that)

- "It was excellent. I like the idea of using difficult problems and the way Rajat tries to go through all the possible explanations, his thought process. Excellent idea to have a next steps slide with very clear instructions and question recommendation." - Feedback on Bold Face Session conducted on Oct 2.
